THE REGENCY QUESTION-PRESS PROSECUTION IN

RERIAN—IMPORTANT RAILWAY NEGOTIATION.
We have advices from Berlin to the 17th ultimo inclu-Sive.

The Volke Zeitung and National Gasette had been seized for publishing articles on the regency question.

No date had as yet been fixed for the convocation of

the Chambers.
The Journal des Chemins de Fer says:
M. Talabot and Baron J. de Rothschild have just concluded a very important negotiation at Vienna. The Austrian government concedes to the Lombardo-Venetian Railway Company the Trieste line, 10 kilomètres (\$4 ths of a mile each) in length, and the Verona line, 220 kilometres. Railway Company the Trieste line, lo kilometres (Aths of a mile each) in length, and the Verona line, 220 kilometres. These lines having the greater part finished and at work, the company will pay 77,000,600f. (170,000,000f.) to the Austrian government. If, however, the receipts do not exceed seven per ceni in 1871, the above sum will be reduced to 125,000,000f. Independently of these lines sold to the Lombardo-Venetian Company, there has been conceded to it the line from Bautzen to linspruck, and a line from Trieste to Agram and Sesseck, and it is probable that it will shortly take from the Francis Joseph lines the railways from Pesth to Marburg, and from Oldenburg to Kanisa. The capital necessary for these different lines, exclusively of that from Trieste to Vienca, is estimated at about 300,000,000fl, but as there is granted for those sections a guarantee of interest of five per cent over and above the sinking fund, it is probable that they will be constructed by means of bonds. What justifies this is that the parts of the Francis Joseph line which have been purchased will be paid for in that manner. It appears that 100,000 new bonds will be created, which will, it is said, belong to the shareholders of the Lombardo Venetian Company. This operation, which is the most considerable that has been effected for many years, completes the network of Italy, which, with the lines from Rome to Anceas and Bolegna, and to Civita Veechia and to Naples, forms the ensemble of the Italian railways, and puts Europe in communication with those rish countries.

Russia.

The Emperor and Empress of Russia arrived at Moscow on the 6th ultimo. Prince Gortschakoff accompanies their Majestics. During his absence the Ministry of Foreign Affairs is intrusted, by imperial ukase, to M. Tolstol.

An imperial rescript, dated from Moscow, confers upon General Mosravieff, Governor General of Eastern Sibera, the dignity of Count of the Empire, with the title of Amoorski, as an acknowledgment of the services rendered by the General, who negotiated the recent treaty with China, and to whom, according to the terms of the rescript, Siberia owes the commencement of her civil regeneration.

THE LONDON MONEY MARKET.

(From the London Times (City Article,) Sept. 23.)

The English funds have been dull to-day, without any obvious cause, since, although a payment of 25 per cent on the new India Loan had to be met, money was abundant in the Stock Exchange at 2 per cent, and a further very considerable supply of gold was taken to the bank. Consols for money were first quoted 97½ a 97½, and they left off at 97½ a 97½ for money, and 97½ a 97½, and they left off at 97½ a 97½ for money, and 97½ a 97½ for the 12th of October. India stock closed at 216 a 219; India bonds, 10s. a 16s.; and exchequer bills (March) 35s. a 38s., (June) 25s. a 28s. premium.

The payments now remaining to be made on the India Loan are two, of 25 per cent each, which will fall due respectively on the 18th of October and 15th of November. The amount of the loan was 23,579,000.

and 72f. 85c. for the end of the month, showing a reaction of a quarter per cent.

The amount of gold taken to the bank to-day was £300,000, comprising £100,000 bar and £200,000 Russian. The total already sent in since the date of last week's return is thus raised to £420,000, and the stock now held must therefore be considerably larger than at any period during the past five years.

The railway market has again been flat, partly in sympathy with the funds and partly from the absence of any extensive general business. In American securities Rilmois Central and New York and Eric were heavy. Mines were duit and show little change. In miscellaneous securities a further reduction took place in Atlantic Telegraph, the final price being 300 a 330; Red Sea Telegraph left off at \$\lambda \part \partial \partia

THE MERCENT ADVANCE IN THE PRENCH PUNDS. (From the London Times (City Article) Sept. 21.)

Nowhere so much as in France, and especially under the present regime, do Bourse operations take their fonce from the court; and if the present rise is warranted it must follow that a terrible weight which had previously existed must have been taken off. What that weight was and what were the considerations for its removal those only can pretend to judge who may have experimites for fathoming imperial secrets. Suffice it to record that up to within a few weeks back and for a long preceding period, there was something on the political mind of France which rendered the rentes worth dive or six per cent less than their present price. Either the alarmists were right at that period or the buoyancy now is ridiculous—the more so since if the statement of Lord Derby's government that they are not aware of France having during the part year or two made any extraordinary warlike preparations is correct, our own course, by greatly increasing our defences, must have been calculated to oftend the natural susceptibilities of that nation at the time when their relations had just passed from the friendly even to the confidential stage. Consequently, neither speculation, money, or the coordinaties of the Rittah Cabinet have primarily find anything to do with the matter. All that we know is that in-tead of our affairs in India going from bad to worse, as was anticipated, the rebellion has been wonderfully quelled, and our prestige placed higher than every that at the same time, owing to the patriotism of the alarmists, and the visit of the Biouse of Commons to Cherbourg, England has been put in a good state of detence: that all at once, under these circumstances, things have become very bright and pacific among our neighbors, and that they seem to have arrived at an understanding by a sort of freemasonry that thoughts of aggression on the one si

THE SLAVER HAIDEE.

Important Affidavit in the Case—The Prison

ers in Court.
Before United States Commissioner White. The case of the United States vs. John B. Macomber an five of the crew of the scuttled slaver Haidee was brought up before United States Commissioner White yes terday, at 2 P. M. The prisoners were all present. They were well dressed, hardy looking men, in the prime of life, and thoroughly tanned by exposure at sea. The sail-ors evinced but little fear or auxiety as to the result of their trial; not so, however, with the first mate, Macomber. He appreciates his position, and is consequently ill

Ex United States Assistant District Attorney Joachimser appeared as counsel for the prisoners. He objected to the affidavit as being insufficient to hold the prisoners, because it did not show that the parties held in arrest, or any of them, were citizens of the United States, or were on board a ship of the United States, or one belonging in whole or in part to any citizen or citizens of the Cast. of the States. He held that it was necessary one, at least, of those facts should appear, vide the eleventh section of the Congressional statute of May 15, 1820, in order to sustain the prosecution.

The United States District Attorney, Theodore Sedgement, cansidered the objection to the warrants and affida-

wick, considered the objection to the warrants and affida-vit a mere technical one; that even if it was a good one, the commissioners could do no more than hold the case over for a day, until the default could be remedied by a new warrant or affidavit, or by remedying the present

OUR HAVANA CORRESPONDENCE.

The Cove of the Staver Haider-Two Hundred and Forty Three of her Cargo Storved to Death.

The cargo of bozales, of whose disembarkation ne Cardenas you were advised in my last letter, were landed from the ship Haidee, of New York. There were 903 landed, and the one that was captured was found in a boat and supposed to have belonged to the Halder's eargo Quite an excitement has been caused here by its becoming known that two hundred and forty-two of these poor Afri cans had died on the passage of starvation. An oister of the Real Audencio has been sent down to Cardenas to in stitute an inquiry into the affair; but what benefit, excepto the older, who will be well paid for his journey, will be derived from this stop? The owners of the Africans, or rather those on whose account they were imported, are well known, and reside in this city. The late Spanish captain and the supercarge of the Huidee are to be found in this city; and this sending an older to Cardenas is sheer humbug. I doubt much if John Bull will be satisfied with it; and mark me, we shall hear more of this matter here-

after.

The Hance is believed to have gone to Caracus or to The Haidee is believed to have gone to Caracas or to Campeachy—most probably the latter port; however, her to find certain parties attempting to cast blame upon Mr. Acting United States Consul General Savage for his prompt and energetic conduct in respect to the Haidee. He sent circular letters to the various United States authorities at the ports where it was believed the Haidee might go to, so as to easure her capture, and this probably was not pleasing to the parties to whom I refer.

OUR CARDENAS CORRESPONDENCE.

other minor officials. They arrived at the above named place in short time, but the bird had flown, feathers and all, leaving only one, in the shape of an old, good for nothing negro, left purposely by the slavers as a sign of contempt for the Governor.

A friend of mine who saw the slaves on their way into the interior, says that he has not seen a more healthy set of negroes.

Only one of the negroes has been captured, and that took place here in town the other night. A patron or captain of a fishing smack brought a bozale into town, and offered him for sale to another man, who, angry at not being able to have the negro at his own price, cried out, "Stop that man with the bozale." This he cried several times, until it attracted the attention of a watchman, who came and apprehended the captain and bozale. The captain is now in juil, but I believe he will soon be out, as there will not be wanting some one to influence his release.

THE YORKVILLE RIOT.

proner's Inquest upon the Body of Michael Collum-Condition of the Wounded Men-Recovery of More Goods, &c., &c.

The Yorkville riot was under investigation by Coroner Gambie Nesterday. A number of witnesses were examined, but the evidence elicited went to implicate but one of the prisoners—Martingoli Giatano—as having been concerned in the difficulty. It was shown by two witnesses that Giatano commences the knifing business by stabbing Rourke in the head, and that immediately thereafter a general onslaught was made then from the results and others. The statement in Some of the evening newspapers yesterday, that buth Trac; and Barns had died from the effects of their wounds, is entirely incorrect. Burns was examined yesterday by Coroner Gamble, and gave his testimony with much clearness. He is in a critical condition, however, and may not recover. Tracy remains at Bellevue Hospital, in a somewhat improved condition. The house of Guiseppi Giusti (one of the Ralian prisoners now under arrest), corner of Canal and Centre streets, was searched by detectives Shangle and others on Monday night, when a large quantity of goods, supposed to have been stolen, were recovered. The works of about four hundred and fifty watches, a quantity of silk goods, a general assortment of cutlery and miscellaneous goods, were discovered. The property was taken to the headquarters of the police, corner of Broome and Crosby streets, for the purpose of identification. Giusti is the partner of Ochea in the proprietorship of the Cosmopolitan Gardens, and is one of the prisoners who was heard to say that he killed none but loafers. Dr. D. C. Mourant:

Dr. D. C. Mourant:

Your magnetic plaster has given unbounded satisfaction wherever's has been used. Some of my customers have tool me that they would not part with their box of plaster for ten dollars (\$10) if they could not procure more. I can recommend it with great confidence from the fact that exceedly a day passes without having some person testifying to its unequalled curative and pain destroying properties.

Your plaster cannot find its representative value in dollars and cents. It is beyond price, though every man, woman and child may possess if for a mere trifle. I therefore, believe that is will in due time become the leading external remedy of this country, and perhaps of this wonderful and enlightened age, Yours, truly.

MORFHEAD'S magnetic plaster is sold by all druggists everywhere. Price 20 cents a box.
